Washington, DC 20554

IB Docket No. 11-109 Comments Regarding the LightSquared Technical Working Group Report

Dear Ms. Dortch:

Please continue the commission's efforts to increase the availability of spectrum for high-speed broadband internet access by supporting LightSquared and their plan to launch a new national 4G-LTE broad band wireless network. We need this network to meet the increasing demand on spectrum assigned to broadband wireless.

This access to spectrum will make the opportunities for more wireless broadband connectivity a reality here in South Texas and for over 260 million Americans across the country. Organizations like mine, dedicated to helping others, depend on reliable and affordable wireless internet for large parts of our efforts. Knowing that a company like LightSquared, with their satellite and telecommunications experience, is dedicated to making this happen, is assuring.

This buoyed with their efforts to address interference issues with your Commission and the GPS industries make this plan our best shot to achieve the national goal of coverage and wireless infrastructure. In closing, please continue to work towards expanding our broadband capacity by approving LightSquared's plan.

Respectfully,

Richard Diaz
